EXAMINER'S AMENDMENT

1. The following changes to the drawings have been approved by the examiner and agreed upon by applicant during a telephone interview with Konstantin M. Linnik on Friday February 25, 2005:

Figure 4, filed on 10/14/2004, will be amended to include a reference number 400 that will refer to concept landscape visualization screen 400. See page 1 line 13 of applicants specification and figure 4 filed on 9/29/2000. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The remaining figures filed on 10/14/2004 are acceptable.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Claims 1-12:

The prior art of record fails to teach or suggest enabling the user to select from a first generation method and a second generation method, selecting a first or second generation method, generating first or second concept landscape visualization based upon the user selection, wherein the second visualization differs from the first visualization for the same data records based on the selected method. These claims are statutory because 1) a user selects the generation method and 2) the computer-implemented method generates a visualization that the user may view.

Claims 13-16:

The prior art of record fails to teach or suggest selecting from different methods for generating different visualizations from the same data records, generating a two-dimensional map representation of the data records based on the vector representations created from the data records, and superimposing the two-dimensional map representation on the concept landscape visualization. These claims are statutory because 1) different methods for generating different visualizations from the same data records are selected and 2) the computer-implemented method generates a visualization that the user may view.

Claims 33-38:

The prior art of record fails to teach or suggest receiving a user command to display information associated with a certain region of the visualization in response step of receiving retrieving terms associated with the region and a numerical value associated with each term where the value associated with each retrieved term represents the proportion of the entire region that the retrieved term represents. These claims are statutory because the computer-implemented method displays information , receives a user command to display information, generates a charts that displays the name of retrieved terms, and associates displayed terms with a segment of the chart.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
